## Bulk hypo costs too high?

# YOU'RE SAFE WITH MIOX.

### MIOX Introduces the Revolutionary New Self-Cleaning VAULT™!

- Small series on-site generator: 15-100 ppd
- Virtually maintenance free
- High efficiency - over 40% improved salt and energy efficiencies
- Low lifecycle cost
- Convert easily between sodium hypochlorite and advanced mixed oxidant
- Expandable capacity for ultimate flexibility
- Improved flow control, air-cooled power supply, and new touch screen display

MIOX® delivers the safest treatment system available while eliminating the dangerous use of hazardous chemicals. This means safer operation, a safer presence in local neighborhoods and communities and much greater safety to the environment compared to other treatment methods. Reduced transportation costs and a highly efficient, optimized cell design makes MIOX a cost-effective safe investment.
